

National Turfgrass Evaluation Program (NTEP) 2005 Kentucky Bluegrass Variety Trial

2011 Final Report

J. S. Ebdon, Ph. D., and W. T. Griffin

The National Turfgrass Evaluation Program sponsors variety trials throughout the continental U. S. and Canada using uniform testing procedures. The objective is to evaluate and identify cultivars (varieties) that perform best under the different and diverse environmental conditions (climatic, soil, and cultural) associated with the many NTEP locations cooperating as part of the program. NTEP publishes annual reports that summarize the results collected at the 25 or more NTEP sites such as the University of Massachusetts. The NTEP data is made available on line at www.ntep.org and is used by turfgrass specialist and practitioners to help recommend and select varieties that grow best at their specific location. NTEP evaluates turfgrasses adapted to both cool-season (northern latitudes) and warm-season (southern latitudes) areas.

The 2005 Kentucky bluegrass variety trial plots were seeded from September 28 to October 3, 2005. There are 110 varieties represented in the test including 3 replications for each entry (variety). Turfgrass quality ratings (1 to 9 scale, 9=best) taken throughout the growing season from 2006 through 2010 are reported in Table 1 as yearly averages. Yearly turfgrass quality means averaged over a 5-year period are also reported in Table 1. Yearly leaf spot ratings caused by *Drechslera poae* averaged over a 4-year period are reported in Table 2. Yearly genetic color ratings and averaged over a 5-year period are reported in Table 3. Yearly leaf texture ratings and averaged over a 3-year period are reported in Table 4. Yearly shoot density ratings and wear tolerance are reported in Table 5.

All data means for entries are order in tables from best to worst.

Entry numbers, cultivar names, and plot-plans are included in this report.

Cultural Practices:

- **Mowing height:** 1.25 inches with reel mowers, 3 mowings per week.
- **Fertility:** 3.5 lbs N/1,000 ft²/year.
- **Irrigation:** none.
- **Fungicides:** none.

Recommendation:

Turf Quality

The following commercially available entries have performed well in overall turf quality providing acceptable quality (≥ 6.0 , Table 1) based on 5-yr averages: Avid, Bewitched and Diva.

The following commercially available entries were unacceptable in overall turf quality (≤ 5.25 , Table 1) based on 5-yr averages: Bandara, Bariris, Cosair, Emblem, Kenblue, Reveille.

Leaf Spot Disease Resistance

The following commercially available entries exhibited good leaf spot resistance (≥ 7.0 , 1 to 9 scale, 9=no disease, Table 2) based on 4-yr averages: Avid, Belissimo, Diva, Dynamo, Glenmont and Prosperity.

The following commercially available entries exhibited unacceptable leaf spot resistance (< 6.0 , 1 to 9 scale, 9=no disease, Table 2) based on 4-yr averages: Bandara, Cosair, Kenblue, Mystere, Reveille, Shamrock, Skye, Spitfire, Starburst.

Genetic Leaf Color

The following commercially available entries exhibited dark genetic green leaf color (≥ 7.0 , 1 to 9 scale, 9=darkest genetic green color, Table 3) based on 5-yr averages: Apollo, Arrowhead, Avid, Bewitched, Beyond, Blueberry, Cosair, Emblem, Everglade, Excursion, Nu Destiny, Prosperity.

The following commercially available entries exhibited light genetic green leaf color (≤ 5.5 , 1 to 9 scale, 9=darkest genetic green color, Table 3) based on 5-yr averages: Bariris, Harmonie, Julia, Kenblue, Washington.

Genetic Leaf Texture

The following commercially available entries exhibited the finest genetic leaf texture (≥ 6.5 , 1 to 9 scale, 9=finest leaf texture, Table 4) based on 4-yr averages: Belissimo, Harmonie, Washington.

The following commercially available entries exhibited the coarsest genetic leaf texture (≤ 5.5 , 1 to 9 scale, 9=finest leaf texture, Table 4) based on 4-yr averages: Avid, Reveille, Starburst.

Density and Wear Tolerance

The following commercially available entries exhibited the best tolerance to wear (≥ 6.5 , 1 to 9 scale, 9=no injury, Table 5): Avid, Bewitched, Diva, Everglade, Everest, Excursion, Julia.

The following commercially available entries exhibited unacceptable tolerance to wear (≤ 5.0 , 1 to 9 scale, 9=no injury, Table 5): Bariris, Cosair, Emblem, Kenblue, Mystere, Reveille, Rhythm, Skye, Spitfire, Starburst.
