

# Massachusetts 4-H wants you to be a Maker

**Duct Tape Double:** Make a custom Mannequin for a doll and use it to design an outfit. (Doll should be 18" or smaller.) <http://makezine.com/projects/make-39/duct-tape-double/> The Duct Tape Double project is a quick and easy way to make a custom mannequin. It uses cheap materials you can find around the house to create a dimensionally accurate replica. Use your new double to craft custom garments that fit perfectly every time, or step it up a notch and venture into well-tailored wearable technology. Use a tight-fitting shirt that covers the area that you want to replicate. If you want to add length beyond the shirt, cover the additional area with plastic wrap. Make sure that the model is comfortable and can breathe easily.
