U Mass Grape Notes - May 31, 2013

Phylloxera

The Northern Grapes Project, in an effort to be more connected with our audience, will be sending emails on a more frequent basis that include information on timely topics. We’ll pull information from Northern Grapes team member blogs (as we have today), past webinars and newsletters, and various other sources.

Today we’re sharing a blog post from Tim Martinson’s “Northern NY Grape Management Update” about phylloxera on Frontenac (http://blogs.cornell.edu/nnngrapeupdate/2013/05/27/phylloxera-on-frontenac/).
We hope that you'll all find this new effort useful, and as always, welcome any feedback.
