ECO 611
Offshore Wind Energy – Environmental Impacts, Siting, Permitting, and Stakeholder Engagement

Meeting Time: Online, Asynchronous

Instructor: Dwayne Breger, Ph.D.
Environmental Conservation

Teaching Assistant: Max Dilthey

Weekly Online Synchronous Sessions:
Office hours, content review, guest speakers or on-line contact time

Course Description:

Before construction begins on an offshore wind farm, there is a rigorous process of assessing ecological and environmental impacts, obtaining any Federal and State permits, and engaging with stakeholders. This process is expensive, and vital to the successful installation of an offshore wind farm. A thorough understanding of these procedures is essential to all professionals in the offshore wind industry. This course is designed to guide the student through this process, from the time the potential offshore wind development site has been identified, until construction is complete and the wind farm is operational.

The on-line course will consist of recorded lectures with slides, assigned readings, problem sets, and two exams. Students will engage with the instructor and fellow students through robust online discussion sessions and postings.

Learning Objectives:

Upon successful completion of this module, students will understand:

- Ocean and benthic environment and ecology;
- Threatened/endangered/commercial species of concern;
- Pre-and post-construction monitoring;
- Impacts of offshore wind construction and operation;
- Impact mitigation;
- Federal and State ocean jurisdictions;
- BOEM – leasing and auctioning for offshore wind development rights;
- Environmental and other permits under NEPA and other laws;
- Permitting of subsurface cables, landfall, and interconnection;
• Key stakeholder groups and perspectives;
• Engagement, understanding, and finding common ground;
• Surveying opinions of stakeholders and general public; and
• Rules and best practices on public hearings and transparency.

**Reading Materials:**

Readings will be assigned from academic literature and applied professional and governmental reports on present-day offshore wind developments. There is no assigned textbook for the class. All readings will be listed and posted to Moodle. You should complete the assigned readings prior to engaging with the corresponding on-line course module.

Course Policy and Requirements:

This course does not have any predetermined scheduled meeting times and the course site and modules can be accessed at any time during the semester. A weekly course calendar is provided to suggest the reading and lecture schedule. However, homework assignments and exams will be subject to strict timeframes and due dates, and will not be accepted late without express advance permission from the instructor. Homework assignments will be graded with feedback provided.

There will be 5-10 homework sets given during the course of the semester. There also will be one mid-term exam, and one final exam. The exams will be taken on your own time but during a prescribed time period. All homework sets and exams will be subject to the UMass Academic Honesty Policy, and work is to be completed individually by each student.

Homework sets and exams are required to be submitted as PDF files through Moodle, and will undergo similarity checks.

Grading Scale and Criteria:

Individual grades for the course will be based on the following scale.

A  93-100%
A- 90-92%
B+ 87-89%
B  83-86%
B- 80-82%
C+ 77-79%
C  73-76%
F  Per policy of the Graduate School, grades below a C will result in a failing grade

Students who are taking the course as an elective graduate course, and who are not taking the course in fulfillment of the Offshore Wind Professional Certificate, may elect to take the course as an Optional Letter Grade (OPG).

The weights of course assignments and activities are as follows.

Exam 1  25%
Exam 2  25%
Participation 10%
Homework  40%
Total 100%
*As an on-line course, participation will be evaluated based on 1) evidence (available from the on-line platform) that the students has spent the expected time engaged with each asynchronous module/lecture, 2) student engagement in accessing and contributing to on-line posts prompted throughout the course, and 3) active engagement of student in weekly real-time discussion sessions with instructor.

**Academic Honesty Policy Statement:**

The integrity of the academic enterprise of any institution of higher education requires honesty in scholarship and research, and academic honesty is required of all students at the University of Massachusetts.

Academic dishonesty is prohibited in all programs of the University. Academic dishonesty includes but is not limited to: cheating, fabrication, plagiarism, and facilitating dishonesty. Appropriate sanctions may be imposed on any student who has committed an act of academic dishonesty. Instructors should take reasonable steps to address academic misconduct. Any person who has reason to believe that a student has committed academic dishonesty should bring such information to the attention of the appropriate course instructor as soon as possible. Instances of academic dishonesty not related to a specific course should be brought to the attention of the appropriate department Head or Chair.

For more information about what constitutes academic dishonesty, please see https://www.umass.edu/honesty/.

The procedures outlined at the website listed above are intended to provide an efficient and orderly process by which action may be taken if it appears that academic dishonesty has occurred and by which students may appeal such actions. Since students are expected to be familiar with this policy and the commonly accepted standards of academic integrity, ignorance of such standards is not normally sufficient evidence of lack of intent.

**Accommodations:**

The University of Massachusetts is committed to making reasonable, effective and appropriate accommodations to meet the needs of students with disabilities and help create a barrier-free campus. If you are in need of accommodation for a documented disability, register with Disability Services to have an accommodation letter sent to your faculty. It is your responsibility to initiate these services and to communicate with faculty ahead of time to manage accommodations in a timely manner. For more information, consult the Disability Services website at http://www.umass.edu/disability/.
