Number of gift kits (\$27.00 each) _____

Order total (\$) _____

Thank you for thinking of our lab when selecting gifts this holiday season. Please complete this form to order gift kits. **Each gift kit is \$27.00, payable by check or money order to “UMass” (no cash).** This includes the cost of a routine soil test with fertility recommendations (\$20), a soil organic matter test (\$6), and postage and handling (\$1).

The gift kits include directions for collecting and submitting a sample, a sample bag, and a sample envelope (not pre-paid) to return the sample once it is collected. The gift kit will be mailed back to you, the gift giver, in a mailer envelope. Inside the mailer, each kit will be in an envelope suitable for gifting. We are not able to ship to a gift receiver at this point in time.

TIME TO FULFILLMENT Gift kits will be mailed out within one week after we receive your order in the lab. Please plan ahead to ensure you receive your gift kit(s) in time for your holiday, accounting for the busy mail season for the post office. If you are gift giving for Christmas, the lab recommends that your order is in the mail by 12/1 so that it is received and returned in time. We will continue to fulfill orders postmarked through 12/31/24.

Limited time offer. Gift kit offering ends on 12/31/24. Orders postmarked 2025 will not be processed. The lab cannot guarantee delivery dates, but will make every effort to mail your gift as soon as possible. Each kit has a unique code redeemable only once. The gift kit order form is required to claim the prepaid sample. Prepaid samples can be redeemed through 12/31/2029.
