

QUINSTAR 4L
EPA Reg. No. 42750-169

CRANBERRY CHEMIGATION TIMING

**This recommendation is made as permitted under FIFRA Section 2(ee)
and has not been submitted to or approved by EPA.**

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

CHEMIGATION INSTRUCTIONS – CRANBERRY USE ONLY

Crop injury or lack of effectiveness can result from non-uniform distribution of treated water. If you have questions about calibration, you should contact State Extension Service specialists, equipment manufacturers or other experts. Do not connect an irrigation system (including greenhouse systems) used for pesticide application to a public water system unless the pesticide label-prescribed safety devices for public water systems are in place. A person knowledgeable of the chemigation system and responsible for its operation or under the supervision of the responsible person, shall shut the system down and make necessary adjustments should the need arise.

Solid Set and Hand Move Irrigation Equipment: Determine acreage covered by sprinkler. Fill tank of injection equipment with water and adjust flow to use contents over a thirty to forty-five minute period.

Mix desired amount of product for acreage to be covered into quantity of water used during calibration and operate entire system at normal pressures recommended by the manufacturer of injection equipment used for amount of time established during calibration. Provide constant mechanical agitation in the mix tank to insure that the product will remain in suspension during the injection cycle. This product can be injected at the beginning or end of the irrigation cycle or as a separate application. Stop injection equipment after treatment is completed and continue to operate irrigation system until pesticide is cleared from last sprinkler head.

Application time can be reduced to less than 30 minutes if experience has shown that the existing chemigation equipment can distribute the product uniformly over the area to be treated.

Note: All applicable directions, restrictions, and precautions on the Albaugh QUINSTAR 4L package label are to be followed.

This labeling contains supplemental instructions and restrictions for use of this product which may not appear on the package label. Read and carefully observe precautionary statements and all other information appearing on the product label. This labeling must be in the possession of the user at the time of pesticide application.

IMPORTANT NOTICE

BEFORE BUYING OR USING THIS PRODUCT, READ THIS BULLETIN, AND THE LABELS FOR ALL PRODUCTS REFERENCED IN THIS BULLETIN, IN THEIR ENTIRETY. FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS.

It is a violation of federal law to use this or any other pesticide product in a manner inconsistent with its labeling. This bulletin contains supplemental instructions for use of the referenced Albaugh product. Follow these instructions carefully. This bulletin should be in the possession of the user at the time of application.

Read the Limitation of Warranty and Liability on the product label before buying or using this product. If the terms are not acceptable, return the unopened package at once to the Seller for full refund of purchase price paid. Otherwise, use by Buyer or any other User constitutes acceptance of the terms of the Limitation of Warranty and Liability on the product label.
