

Resource Information: Water Disinfection

Chlorine Dioxide Disinfection of Produce Washwater. Michigan State University Extension, Agricultural Engineering Information Series, AEIS #654, File #18.141, July 1999 (revised).

Chlorine Disinfection of Produce Washwater. Michigan State University Extension, Agricultural Engineering Information Series, AEIS #653, File #18.141, July 1998.

Chlorine Use in Produce Packing Lines. M. A. Ritenour, S. A. Sargent, and J. A. Bartz, Indian River Research and Education Center, Ft. Pierce, University of Florida, Gainesville.

Disinfection of Produce Washwater. Michigan State University Extension, Agricultural Engineering Information Series, AEIS # 652, File #18.141, July 1998.

Using Oxidation Reduction Potential (OPR) for Water Disinfection Monitoring, Control, and Documentation. T. V. Suslow, Department for Vegetable Crops, University of California, Davis.

Ozone Disinfection of Produce Washwater. Michigan State University Extension, Agricultural Engineering Information Series, AEIS #655, File #18.141, July 1998.

Prevention of Postharvest Water Infiltration into Fresh Market Tomatoes: Food Safety and Spillage Control Practices. T. V. Suslow, UC Davis Vegetable Research and Information Center.

Ultraviolet Disinfection of Produce Washwater. Michigan State University Extension, Agricultural Engineering Information Series, AEIS #656, File #18.141, July 1998.

WashWater Sanitation: How Do I Compare Different Systems? D. Zagory, Davis Fresh Technologies, LLC (davisfreshtech.com).

Water Disinfection: A Practical Approach to Calculating Dose Values for Preharvest and Postharvest Application. T. V. Suslow, University of California Agriculture and Natural Resources, Publication 7256.
